SUBJECT: Trust Fund Package - Comprehensive Site Assessment (CSA)
Harold Hall Property
Jamestown, Guilford County, NC

Dear Mr. Hall:

The Comprehensive Site Assessment (CSA) for this site is due September 12, 1994. Because of the intermingling to the chlorinated solvent plume allegedly emanating upgradient and the petroleum plume on the above referenced site, there has been some confusion with regards to how to proceed with this phase of the project.

It has been decided that you must define the extent of the petroleum contaminant plume; you need not "chase" the chlorinated solvent plume. This means that your consultant needs to delineate the "0" boundary for the petroleum contaminated soil and groundwater both vertically and horizontally. Your consultant may want to contact the consultant for A Cleaner World to discuss the clean up system planned for that site.

A complete CSA is due by September 12, 1994.

Sincerely,

A handwritten signature in cursive script, appearing to read "Cindy Rintoul".
